

## Economic Platform

We the people of the White Knight Party believe that our country's economic position needs to be improved. If the candidate from the White Knight Party gets elected we will improve the economics by decreasing the debt and we can improve the people of our country's welfare and their economics by taxing everyone the same amount. We believe that economics is an important role in our country's welfare. The White Knight Party believes that by improving the economics of the country, it will better off the people and the country itself.

Getting rid of our country's debt will be a big task, but we from the White Knight Party intend to face it head on. We will slowly get rid of the debt by taking a portion of our country's taxes and put them towards paying off the country's debt. We from the White Knight Party know that paying off our trillion dollar debt will take a long time but our country needs to start somewhere and we believe that this is the best option. By taking our debt problem and starting to pay it off, we believe that it will better the country by preventing any conflict in the future. Decreasing our country's debt will be difficult but the White Knight Party if elected will do its best to decrease the country's debt.

The White Knight Party will also change the amount each person gets taxed. We will change it so that everyone gets taxed ten percent of their income. This will hopefully appeal to the rich, the middle class, and the poor. By taxing only ten percent of the people's income it will allow the people enough money to provide for themselves and for their family. The money that will be taxed from everyone will help pay off our country's debt. We from the White Knight Party believe that only taxing ten percent of everyone will keep the people of our country and it

will provide enough money to keep the government running smoothly. Also, by taxing everyone based on their income it should make everyone feel like they are being treated the same. Taxing ten percent of a person's income will be very baneful to the people and the government. IT will hopefully make the people happy and provide the government with money to spend on our country's welfare.

In conclusion, we the people from the White Knight Party believe that economics is a big factor in our country. The White Knight Party believes that we should start trying to decrease the country's debt and we also believe that the government should tax all the people ten percent of their income no matter how rich or poor they are. The party believes that by doing these things we can better our country and put it in a better state for the people. The White Knight Party will do their best if elected to put these changes into action so it can better our country. We hope that our idea is what the people want and need. The White Knight Party hopes to gain the people's support and hope that the people agree with our ideas.
