

Education Platform

As part of the White Knight Party, we believe that education is a major role in the development of our country as a whole. If people were not educated, our country would be diminishing slowly and then all at once. We believe that in order for the government to run, people need to be educated on the past examples of history so that it does not repeat itself. As one historian said, "Those who do not learn from history are doomed to repeat it." Therefore, we believe our education system needs to be based off of the following four statements: government funding of education, freedom for schools to make some decisions, students must finish the highest grade available to them which is twelfth grade, and the financial aid should be based on yearly parental income.

First of all, our education system should be supported and funded by the government on all means. Since education is essential to the advancement and maintaining of our government, the people should not have to pay in order to attend any public school or educational based school activity. Schools should also have a system in place to keep the students protected throughout the regular school day and any extra-curricular activities. In addition, the government should designate days throughout the school year all over the nation for student led campus cleaning projects to take place so that the students have a clean environment to learn and excel in their duties.

Second of all, although the schools are funded by the government, they should have their own responsibility to determine what choices are best for the students' well-being that are attending the school. Whatever the decision may be, the respective school shall make that decision. All schools should also require students to say the pledge of allegiance at the beginning of every school day.

Third of all, all children must attend school until the graduation of twelfth grade. They, from then on have the decision of whether or not to attend a college or university. Throughout these years, the students will be taught basic classes on history, science, math, and english as well as classes on a foreign language, technology, civics and economics, and a physical education class of some sort. The students' foreign class may include French, Spanish, Italian, German, Russian, or any other language common throughout the world today.

Lastly, should a student choose to attend a college or university after his graduation of twelfth grade, the financial aid of wherever he should choose to go will be based upon the combination of both parent's yearly income. For instance, if a student wants to attend a university, and is accepted first, then the student may qualify for some financial aid depending on how much money his parents had made the previous year. This helps to encourage more students to achieve a higher degree of education. Also, colleges and universities shall make tuition the same for people attending who live in state and people who live out of the state of which the college or university is located in.

To conclude, our beliefs on education matter immensely. We believe each child needs to be well educated in our communities. It is one of the most essential properties of this country. We also believe that the schools that educate the children should be equipped with the most needed equipment and more importantly, teachers who can teach the material to the students. Our rules and regulations are used to ensure the student receives the best education possible so that our government thrives with the upcoming generation.
